Try your hand at Jungle fishing at Chew Lan Lake located inside Khao Sok National Park, a man-made lake surrounded by mountains and dense rainforest. You will get to fish in an area no other western angler's fish by penetrating as far as possible into the jungle along numerous rivers in search of Big Toman (Giant Snakehead), Striped Snakehead, Cobra Snakehead, Thai Mahseer, River Catfish, Featherback, Rohu and Hampala Barb.

The jungle based camp consists of basic floating raft house purposely built to blend into the environment. There is no air-conditioning or TV. This fishing experience is targeted at adventurous anglers; looking for REAL jungle fishing and are prepared to go without home comforts for a few days.
